Cartes postales // Collection Fruits et légumes

Format 10x15cm

Papier carte 330g couché demi-mat

M

Mangue

«Tu me manges.»

10018601

B

Banane

«Bananniversaire !»

10018602

O

Orange

Orange 404 !
Cette carte n'existe pas.

10018603

L

Laitue

«Merci de ne pas donner de pain aux canards, ça laitue.»

10018604

P

Pomme

«A base de po po po pomme !»

10018605

A

Artichaut

«Avec le réchauffement climatique,
il va faire artichaut.»

10018606

A

Aubergine

«Avec tout ça, on n'est pas sorti de l'aubergine.»

10018607

S

Salsifis

«Les enfants ! Salsifis les conneries !»

10018608

B

Blette

«Faisons l'amour comme des blettes sauvages !»

10018609

P

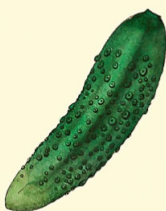

Pastèque

«Alors, steak ou pastèque ?»

10018610

C

Concombre

—concombre = cornichon

10018611

O

Oignon

«L'oignon fait la force.»

10018612

SUMMIT

OLYMPUS MONS

The solar system's highest peak

Spizol is a family of expendable launch systems developed by URB-1 and manufactured by Progress-Moscow Space Centre in Samara, Russia.
 400+ over 1500 flights since its debut in 1995, the Spizol is the most frequently used launch vehicle in the world.
 The Spizol vehicles are used as the launcher for the expendable Spizol spacecraft as part of the Spizol program, as well as to launch uncrewed Progress supply spacecraft to the International Space Station.

For the second time in history, a human-made object has touched the space between the stars.

NASA's Voyager 2 probe now has exited the heliosphere – the protective bubble of particles and magnetic fields created by the Sun.

11179320

A NASA Earth Day poster. At the top left is the NASA logo. The central image is a large jellyfish. Its bell (top part) is a globe showing Earth's continents and oceans. Its tentacles are long, thin, and shaped like DNA double helices. Some tentacles have small green leaves and blue flowers growing from them. A small astronaut in a space suit is floating near the center of the jellyfish. The background is a dark blue space with stars and a crescent moon. In the bottom left, there is a smaller, fainter version of the jellyfish. Below the illustration, the text reads: "In the cosmic depths we discover ourselves" and "EARTH DAY" in large, bold, white capital letters.

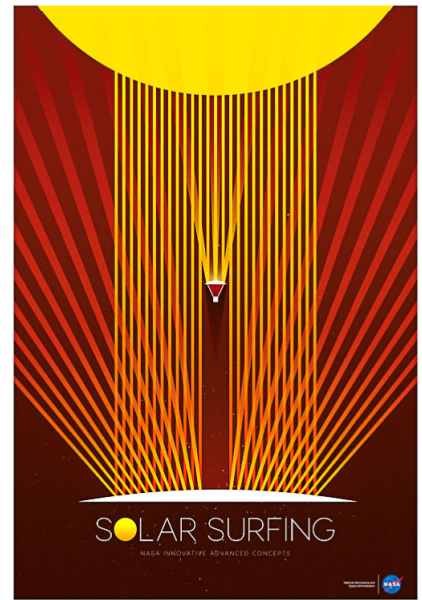

MARS

A vibrant, stylized illustration of a total solar eclipse. The dark, cratered Moon is centered, completely obscuring the Sun. From behind the Moon, a brilliant, multi-colored corona of yellow, orange, and red plasma streams outwards in a complex, swirling pattern against a deep blue sky. In the foreground, the dark silhouette of a forested hillside is visible. On the right, a person is shown in silhouette, sitting on a rocky outcrop and looking through a telescope mounted on a tripod. The overall composition is dynamic and celebratory. At the bottom, the words "EARTH DAY" are written in large, bold, orange capital letters. The NASA logo is positioned between the words "EARTH" and "DAY". Below this, the text "2017 TOTAL SOLAR ECLIPSE" is written in smaller orange capital letters.
